

# THNK.

## TAKE HOME NALOXONE KIT

### Be prepared to combat an overdose with naloxone:

1. Call 9-1-1
2. Perform CPR if person is unresponsive
3. Pop off orange top on vial
4. Draw up 1cc (1mL) of naloxone into the long needle syringe
5. Inject straight into a muscle - thighs, upper butt area, or shoulder
6. Continue CPR for 2-3 minutes
7. If there is no change in 2-3 minutes, repeat steps 4-6

# THINK!

## TAKE HOME NALOXONE KIT

Naloxone is the countermeasure to a fentanyl and other opioid overdose if injected immediately. Ontario has developed a **Take Home Naloxone Kit (THNK)** program to help save lives.
